

### Design

Seat Rail Factory seat rails are designed to be the right height for most drivers. Our unique designs and production methods allow for a lower seating positioning.

### Performance

Seat Rail Factory seat rails are designed with performance in mind. Each rail is welded to be as strong as possible. Unlike two piece designs, our one piece rails will not bend, break, or give under hard braking or acceleration.

### Quality & Safety

Seat Rail Factory seat rails are fabricated by our skilled engineers in JAPAN. To maintain quality, safety, and consistency, we simply DO NOT outsource ANY labor or manufacturing to third world countries. We supply seat rails for other Japanese brands as well as OEM manufacturers. Our original "Seat Rail Factory" Brand products meet Japan's strict "Shakken" requirements and Japanese transportation law safety requirements and can be legally by used on street-use vehicles in Japan. Check with your local government laws/regulations in regard to legality in your country/state/province)

### CAUTION

PLEASE READ THE FOLLOWING VERY CAREFULLY

- THIS PRODUCT IS FOR OFF ROAD/RACE USE ONLY
- WE DO NOT RECCOMEND THE USE OF ANY AIRBAGS WITH THIS PRODUCT
- DEPENDING ON THE SEAT USED, SIDE AIRBAGS MAY BE RENDERED INEFFECTIVE WITH THE USE OF THIS PRODUCT
